email: info@tychon.io

TYCHON's Enterprise Endpoint Management Platform enhances operational resiliency by allowing you to manage your system health, reduce vulnerabilities, and improve online security with real-time endpoint visibility, proactive monitoring, and validation through its Cyber Hygiene Dashboards. Using interactive dashboards, TYCHON decreases your enterprises cyber security risk by allowing organizations to validate security settings at the endpoint in real-time and query specific system(s) to remediate vulnerabilities, add/remove software, quarantine systems, update patches, and more. TYCHON's proactive compliance validation expands your organization's defense-in-depth.

Tychon LLC is a software engineering company that develops advanced enterprise endpoint management technology designed to provide asset visibility and automated continuous endpoint monitoring to the enterprise. TYCHON allows security operators the ability to quickly diagnose and take action against breaches and administrators the ability to manage cyber hygiene via dynamic Cyber Hygiene Dashboards.

CAPABILITIES

Strong Authentication

Protect high-value assets and degrade an adversary's ability to access the network by enforcing your organization's authentication standards to verify a user or device to secure access and information.

Reduce Attack Service

Mitigate the threat of Internet based adversaries and reduce external attack vectors by auditing Internet facing, DMZ, and multi-factor based authenticated web servers to ensure compliance to policy and security controls.

Device Hardening

Reduce internal and external attacks and prevent an adversary's ability to escalate privileges by ensuring all assets have proper configurations and patches and all Internet Facing web servers are within the DMZ.

Detection and Response

Prevent and respond to adversary activity by removing or quarantining Internet facing web servers and systems in violation of policy, hardening settings, and identifying obsolete assets and unauthorized user accounts.

TYCHON COMPLIANCE ENFORCEMENT

- ▶ Enforce accountability, prevent unauthorized access, and avoid network compromise.
- ▶ Identify vulnerabilities on your network to proactively address security issues through a centrally controlled management solution.
- ▶ Prevent exploitation and increase your cybersecurity readiness with real-time visibility.
- ▶ Ensure situational awareness of network threats and mitigations with interactive, easy to use dashboards.

KEY FEATURES

REAL-TIME INCIDENT RESPONSE

Instantly respond to a new threat or IOC, from any vendor, by executing a cleanup, AV update, and services status check across all connected endpoints in a matter of seconds. Accepts both plain English text and full regular expression (REGEX) queries.

- ▶ Efficient IOC Searches
- ▶ One-Click Response Actions
- ▶ Two Person Integrity
- ▶ Target Endpoint by System Tree
- ▶ Netflow
- ▶ Trace

CYBER HYGIENE DASHBOARDS

Interactive dashboards, which display real-time enterprise compliance metrics for up-to-date situational awareness of network risk. Vital reports with details on privileged users, web server compliance, asset inventory, system authorization, required security services, patching, and overall organization software compliance.

- ▶ Strong Authentication
- ▶ Zero Trust
- ▶ Device Hardening
- ▶ Reducing Attack Surface
- ▶ Improved Detection and Response to Attacks

END USER ENGAGEMENT - TYCHON COMMUNICATOR

Close the gap between detection and response with a direct line of communication from the incident responder to the desktop of end users using the TYCHON Communicator platform. Send custom messages to one, some or all users (e.g. inform users that their machines are temporarily quarantined.)

- ▶ Displays Persistent Banner
- ▶ Send Custom Messages to any Endpoint

TYCHON ENDPOINT JOURNAL

Fully indexed record from every endpoint. Continuously monitor and record endpoint and server activity for near-instant identification of threats – present or past – and the complete view of an incident, root cause analysis, and tracing of network propagation.

- ▶ FIPS 140-2 Compliance
- ▶ Historical Data
- ▶ Compressed Messaging to Reduce Bandwidth
- ▶ Fuzzy Hash
- ▶ Netflow

API INTEGRATION

TYCHON's robust set of APIs makes integration with other endpoint or network capabilities straightforward and rapid via custom content creation, expanding data recording fields, and more.

- ▶ External Server Feeds
- ▶ DXL, Open DXL, Kafka
- ▶ SIEM Feeds
- ▶ API/SDK

ARCHITECTURAL FEATURES

TYCHON is built on an open, flexible framework with embedded micro services built using a Client-Server Model with an integrated FIPS 140-2 compliant journal for endpoint data capture. Our custom designed compression algorithm allows data to be sent securely and quickly in any type of network condition, even with low bandwidth restrictions.

- ▶ Open, Flexible Framework
- ▶ Embedded Micro Services
- ▶ Client-Server Model
- ▶ Data Roll-up
- ▶ No Scans required
- ▶ Targeting System Efficiencies

TECHNICAL PARTNERS

TYCHON partners with the best in class industry leaders and service providers to provide enriched endpoint data that is visible, accessible, understandable, trusted, interoperable, and secure.

- ▶ McAfee
- ▶ Elastic
- ▶ Palo Alto
- ▶ ThreatQ and more
