

TYCHON

Attack Surface Management Use Case

TYCHON Enterprise, an advanced endpoint analytics and remediation platform, is a powerful Attack Surface Management tool. **Attack Surface Management** is the continuous discovery, monitoring, evaluation, and remediation of attack surfaces within an organization. Your attack surface is defined as any endpoint within your interconnected network that could be leveraged by an attacker.

TYCHON Enterprise enables our users to search, visualize, remediate, and monitor every endpoint across their enterprise. From discovery to one-click remediation, the TYCHON platform manages every layer of endpoint security to keep analysts in control of their network and minimize attack surface risk.

Benefits

Search

Identify, classify, and assess all your organization's endpoints, including shadow IT, using natural language questions and dashboards.

Visualize

Use built in analytics, reports, and dashboards to analyze endpoints, evaluate risk levels, and prioritize remediation actions.

Monitor

Continuously monitor your endpoints to discover exposures, compliance violations, unknown endpoints, and more.

Remediate

Take advantage of one-click remediations to ensure patch compliance, disable accounts, quarantine systems, and more.

Key Features

TYCHON SENSOR

Lightweight agent built on a micro service engine framework to optimize integrations and provide superior data quality to fulfill use cases.

MESH MODEL

Instantly query up to a million endpoints. Unique architecture components built for scalability and fast response.

OPEN ARCHITECTURE

Built on an open, flexible framework with embedded micro services built using a Client-Server Model with an integrated journal.

INCIDENT RESPONSE

Instantly respond to threats by executing a cleanup, AV update, and services status check across endpoints in a matter of seconds.

TYCHON JOURNAL

Fully indexed record from every endpoint. Monitor and record endpoint and server activity for near-instant identification of threats.

DYNAMIC DASHBOARDS

Interactive dashboards, which display real-time enterprise compliance metrics for up-to-date situational awareness of network risk.

END USER ENGAGEMENT

A direct line of communication from the incident responder to the desktop of end users.

Comprehensive
& Customizable
Endpoint Datasets to
make better decisions.

Minimize Your Attack Surface with
TYCHON Enterprise

- Easy to Use
- Powerful Analytics
- Speed & Accuracy
