TYCHON

TYCHON Agentless
Product Sheet

STIG & IAVA MANAGEMENT
WITH NO NEW INFRASTRUCTURE

▶ TYCHON Agentless delivers STIG, CVE/IAVA, and Endpoint Protection status without adding new server infrastructure or services to endpoints.

▶ Datasets fully comply with Vulnerability and STIG reporting standards and integrate into Comply-to-Connect (C2C) for instant zero trust value.

▶ A lightweight delivery of our most valuable content – designed to interface with Elastic, Splunk, Microsoft Sentinel in Azure, and more.

Benefits

Lightweight
Low impact to end users means a better user experience.

Serverless & Agentless
No services on endpoints and nothing added to infrastructure.

Comply to Connect
Integrated with DoD C2C services for seamless decisions.

Existing Investments
Take advantage of existing Microsoft, Elastic, and Splunk investments.

Local Access
3rd Party tools and admins gain insight without additional configuration.

Cloud & On-Prem
Run from your own IL5/IL6 stack or run on-prem/deployed environments.

TYCHON

Integrated with Existing Investments

TYCHON Agentless deploys through Intune/MECM and is designed to enhance existing investments in Elastic, Microsoft, Splunk, DISA CMRS, and Forescout for easy installation and zero-added maintenance.
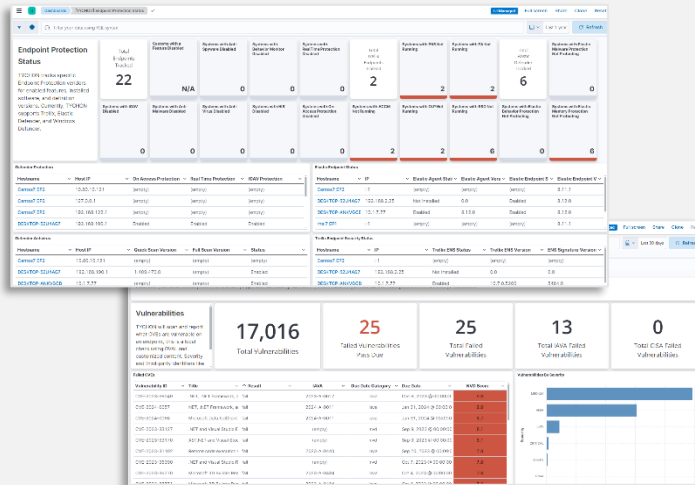

FORESCOUT　　**ELASTIC**　　**MICROSOFT**　　**SPLUNK**　　**DISA CMRS**

Designed for both DoD & FEDCIV/Commercial Environments

Optional Elastic Stack or Splunk integration offers simple, easy-to-use default dashboards to visualize your TYCHON Agentless datasets.

TYCHON Agentless delivers complete *Master Endpoint Record* Management.
