

TYCHON

TYCHON Enterprise Product Sheet

TYCHON Enterprise is an endpoint analytics and remediation platform that delivers situational awareness by providing real-time endpoint visibility and the capability to proactively monitor, manage, and validate Cyber Hygiene compliance.

TYCHON validates security settings at the endpoint in real-time, queries systems, remediates vulnerabilities, quarantines systems, and more all from a single console. This proactive compliance validation decreases your attack surface and expands your organization's defense-in-depth.

Benefits

Search

Retrieve intelligence from endpoints at speed and scale.

Use natural language questions and PowerShell scripts to query the endpoint. Use interactive dashboards for comprehensive real-time visibility at scale.

Visualize

Powerful analytics through dynamic dashboards.

Review automated cyber hygiene data via dynamic, dashboards with accurate reporting on cybersecurity posture and executive level views for leadership.

Remediate

Resolve security and compliance issues with a single click.

Use custom signatures to flag, notify, and block endpoint activity. Disable unauthorized accounts, quarantine non-compliant systems, and more.

Monitor

Continuous monitoring to discover vulnerabilities and compliance violations.

Record, index, and actively monitor endpoints in real-time. Review system activity and gather information about process creation, network connections, and more.

Key Features

Learn how TYCHON Enterprise is revolutionizing Enterprise Endpoint Monitoring, by providing reliable and comprehensive datasets and powerful decision-making tools, all from a single interface.

Extract, Transfer, Load

Endpoint-level ETL helps improve data governance by providing a central repository for endpoint data.

Flexible Architecture

For the DoD, TYCHON completely functions within air gapped networks and scales elastically.

Data to Drive Innovation

Data driven to make better decisions, improve your security posture, and stay ahead of the adversary.

Extreme Scale

Proven real-time insights from massive datasets that deliver enterprise endpoint data in seconds.

Zero Trust Decisioning

Data granularity from the source, ensuring data reliability for zero trust decisioning.
